- Make sure that the + and markings on the batteries are aligned with the corresponding markings in the battery case and the battery holder.
- Do not insert old or exhausted batteries into the recorder.
- Do not mix the type of battery, and do not use both old and new batteries together.
- If the recorder does not operate correctly, replace the old batteries with new ones.
- If electrolyte has leaked, thoroughly wipe the inside of the battery holder, and then insert new batteries.
- Do not keep the battery in a place exposed to direct sunlight or in places with extremely high temperatures, such as near a heater.
- Used batteries should be disposed of in accordance with the local regulations regarding battery disposal.

Advanced Features

Microphone(s)

- Attenuator

The microphone attenuation switch permits the direct use of microphones that differ in sensitivity.

- 0dB : No microphone attenuation.
- -6dB : Input from a microphone(s) connected to the MIC jack is cut by 6dB.
- -12dB: Input from a microphone(s) connected to the MIC jack is cut by 12dB.
- -18dB: Input from a microphone(s) connected to the MIC jack is cut by 18dB.

Setup the "Mic Atten." of the preset menu. (@ P.48)

- Phantom Power

Slide the PHANTOM/MIC switch to on to provide +48V of power for a condenser microphone(s).

ON: +48V is supplied to power condenser microphone(s).

OFF: No microphone power is supplied.

Microphone recommendations

Professional condenser microphone(s) (which require additional power from either the PMD661MKII's phantom power or from another source) are recommended because they provide greater sensitivity and higher quality audio recording.

Dynamic microphone(s) can be used, but they do not yield optimum audio quality recordings in some applications.

Consult with your local dealer to select the appropriate microphone(s) for your specific application. In many cases, they can demonstrate the various performances and characteristics of microphones for your use.

Pre Record

When PreRecord is on and the PMD661MKII is in record pause, it listens to the selected audio input(s) and continuously buffers 2 seconds of audio. Then, when record is started, the PMD661MKII writes the previously buffered 2 seconds of audio to the card and continues to record from there.

Setup the "PreRecord" of the preset menu. (PP P.47)

Audio Filter

Low Cut Filter

The bass region of the input audio is cut as the audio is recorded. Set to On to reduce noise, such as the sound of the wind when recording outdoors.

Setup the "Low Cut" of the preset menu. (PP P.48)

High Cut Filter

The treble region of the input audio is cut as the audio is recorded. Set to On to reduce high frequency noise from the ambient environment.

Setup the "High Cut" of the preset menu. (PP P.48)

Silent Skip

The Silent Skip automatically pauses recording when there is a period of silence and resumes recording when sound resumes.

"Silent Skip" menu setting permits:

 Adjusting the margin sound level that defines silence in Off, –60dB, –54dB, –38dB, –20dB.

Setup the "Silent Skip" of the preset menu. (PP P.48)

Manual Track

When the Manual Track (Manual Track incrementing) is on during recording, press the **FUNCTION** button until "TR" appears on the display, then press the **(F1:TR)** button to increment the audio file. A new audio file is created at that point. The continuity of sound is not guaranteed and depends on the speed of a card or the audio file size.

Auto Track

With the Auto Track (Automatic Track incrementing) On, a new audio file is begun automatically at specified intervals of recording time. The Auto Track can be set to increment every 1, 5, 10, 15 or 30 minutes, or every 1, 2, 6, 8, 12 or 24 hours. The Auto Track makes finding a particular point in a recording easier. For example, if a new audio file begins every minute during playback, the Auto Track makes finding a particular passage easier because of the relationship between file numbers and time. During playback, you can select file number 3 to play approximately the 3rd minute of recording. To go directly to the beginning of the 10th minute, select file number 10, etc.
